Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	Is any person, organization, or system that is outside the prediction system but sends data to it or receives data from it.
Rectangle with numbered header	Process	The activities that convert input data into output data.
Rectangle (solid fill, no number)	Data Store	The Data Store is the place where data is stored for future use or processing.
Labeled arrow	Data Flow	The Data Flow represents the movement of data between the External Entities, Processes, and Data Stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
